## ALTERNATING CURRENTS...

### Looking Great In Cherokee!

By Ron Shafer

Any AEC member that has tried to buy fuel or other items at a convenience store in Cherokee in the last 7 months will tell you that it is a very frustrating experience. This area has been quite busy for months due to an increase in oil exploration and production. When a late February snow storm caused the roof to collapse on Toni's Express Stop, the line got much longer at the town's lone remaining convenience store, The Cherokee Jiffy Trip. This community and this area are way too busy for just one store.

That is why we are so excited to see all the activity in the location of the new building being erected in downtown Cherokee to house Toni's (brand new) Express Stop. Owned and operated by Toni Fox of Byron, OK, the new store will offer the same services as before, which includes food, fuel and friendly folks. The new building is being built by Bar-Te Associates, a construction contractor out of Wichita, Kansas. At the time this article went to press, the expected completion date of the building will be sometime in late October. This will be a very welcome addition to our community and we can't wait to see the new store.

In other good news for this area, we have been informed a ground breaking ceremony is planned for the near future at the site of the new Cherokee Jiffy Trip Truck Stop and Convenience store on the south end of Cherokee. This new store will eventually replace the older building that serves the business at the present time. We have been told that it will include a Sonic Drive-In and a Subway Restaurant. WOOHOO!!! You KNOW what I'm thinking! Yes sir, I'd say things are definitely looking great in Cherokee.

## Picking out a programmable thermostat

It may be time for a programmable thermostat but they are not for everyone. Families who are away during the day and homes with HVAC systems other than heat pumps are best served. (Just maintaining a moderate setting is the best solution for heat pumps.)

Thermostats come in the following styles:

- 7-day models - allow you to set different programs every day and provide the most flexibility.
- 5 + 2 day models follow the same schedule during the week and a different one for weekends.
- 5-1-1 models keep the same sched-

ule during the week and different ones for Saturday and Sunday.

Many units come with multiple features, such as telling you when to change your HVAC's air filter, settings for vacations, and voice programming options.

Programmable thermostats enhance your home's efficiency only when set properly. To be sure to save, set the temperature back for at least eight hours at a time-- for example, when you're at work during the day or asleep at night. You can save 5 percent to 15 percent per year on your heating bills by setting your thermostat back 10 to 15 degrees over that period.
